Aryan Dev

AI Engineer

With 3.5+ years of experience designing and deploying production-grade, high-stakes applications serving millions of users. Over the past 1.5+ years, I've gone deep on **AI-native architecture** — building agentic systems and shipping production code with tools like Claude Code to compress the distance between idea and deployment. That combination gives me hands-on engineering judgment together with product ownership: I stand ready to use agentic coding tools to plan, prototype, and iterate on your software products at lightning speed — turning multi-week roadmaps into days without sacrificing the rigor high-stakes systems demand.

EXPERIENCE

Leeloo
Luxembourg · Remote — leeloo.io

Sovereign AI implementation. We design, build and deploy AI systems for regulated industries. Architected and deployed sovereign AI systems and LLM-powered agentic workflows for regulated industries, ensuring compliance and data residency.

Software Engineer SDE - 2 — February 2025 – September 2026

- Built an OCR-powered bill-capture feature for stralevo.com, a financial app, extracting and structuring transaction data from receipts to automate expense entry.
- Integrated real-time, voice-driven AI conversational characters into browser and Unreal Engine environments using Convai for natural NPC interactions.
- Built AI-first sovereign SaaS products — Stralevo, a sovereign AI accounting layer (stralevo.com); Liberté, free accounting software launching 2026 (liberte.free); and Vivalto, a sovereign AI-first CRM (vivalto.ai).
- Developed Epic1 Academy (epic1academy.org), a game-based learning MMORPG with AI tutors, 12 cognitive BrainMarks, and zero-exam assessment.

GrayQuest
Mumbai · On-site — grayquest.com

India's most advanced fee payment platform for educational systems. 6500+ of India's most respected educational institutions use GQ To power fee payments for 5M+ students.

Software Engineer SDE – 1 — October 2024 – February 2025

- Optimized projects, gave context to QA teams & communicated requirements completion timelines to product managers.
- Reduced load time of Admin project using code splitting and lazy loading.
- Implemented forms UI, Logic & API integration on the Customer portal.
- Added component-based test cases using Jest for the Admin portal.
- Revamped and fixed multiple production bugs across SDK and Customer portal.

Software Engineer SDE – 0 — January 2023 – September 2024

- Built multiple web portals customer-facing, internal & ERP-SDK, while suggesting relevant design changes.
- Integrated SmartMatch API for fetching customer KYC data.
- Converted GrayQuest's landing portal to Webpack react project and revamped the UI.
- Integrated Audit Logs API with frontend events on Admin Portal, using redux toolkit.
- Made multiple Email templates for customer notifications; integrated them with Sendgrid.
- Built forms UI using formik and implemented IAM permissions on the Admin project.
- Added new forms and sections for the Insurance cancellation feature for Customer Portal.
- Added mix-panel events across SDK & Customer Portal.

Bajaj Finance
Patna · On-site — bajajfinserv.in

Largest Indian non-banking financial services company. It is focused on lending, asset management, wealth management and insurance.

Proprietor / Accountant — July 2021 – December 2021

- Managed finance and facilitated income among the employees.

LATEST SOLO PROJECT

Earzbook
earzbook.com

Earzbook transcribes everything you watch and listen to — live — and turns your week into a shareable recap card: themes, insights, and highlights for you and your friends.

Live, in ~99 languages
Sub-second streaming transcription that auto-detects and switches language mid-sentence.

Weekly recap cards
Your week's listening auto-distills into a themed, shareable card — public, friends-only, or private, your call.

Knowledge Radar & Timeline
Every session auto-sorted into themes — watch your intellectual interests take shape and shift, week over week.

Chrome

TECHNICAL SKILLS

AI Systems & Orchestration
Agentic workflows, LLM pipelines, RAG, MCP, fine-tuning, evaluation and model selection, OCR-based data extraction, real-time voice-driven conversational AI. Built with LangChain, LangGraph, and LlamaIndex; fluent with Claude Code, Codex, and Cursor as build tooling.

Product
Requirements definition, scoping and prioritization, build-vs-buy decisions, privacy and compliance tradeoffs, 0-to-1 SaaS product builds, cross-functional delivery with QA and engineering, shipping to production.

Domains
Regulated industries, fintech and accounting, CRM, edtech and gamified learning, NBFC lending and insurance, payments infrastructure, consumer mobile and browser distribution.

EDUCATION

Bachelor of Computer Application — Distance Learning
Mangalayatan University
Aligarh · Remote — January 2023 – 2026

Full-Stack Web Development — Full-time
Masai School
Bangalore · Remote — April 2022 – December 2022

BTech - CSE — Dropped Out
Sambhram Institute of Technology, VTU affiliated
Bangalore · On-site — January 2022 – April 2022

CERTIFICATIONS

GrayQuest's AI Hackathon Event
